## RECENT ADVANCES IN MATERIALS, MANUFACTURING AND MACHINE LEARNING (RAMMML-2022)

## **AUTHORS GUIDELINES**

- 1. Submission of manuscript should be strictly as per **conference template** available at conference website.
- 2. The page limits for manuscript submission 5 to 8 pages.
- 3. Avoid using abbreviations in the Title, Abstract and Conclusions, if possible.
- 4. Manuscripts submitted to our conference are expected to be written in good English and proof read carefully to ensure that research is communicated clearly. (Use of Grammar correction tools such as Grammarly is advised)
- 5. The **Abstract** should contain answers to the following questions:
  - What problem was studied and why is it important?
  - What methods were used?
  - What are the important results?
  - What conclusions can be drawn from the results?
  - What is the novelty of the work and where does it go beyond previous efforts in the literature?
  - Please include specific and quantitative results in your Abstract, while ensuring that it is suitable for a broad audience.
  - References, figures, tables, equations and abbreviations should be avoided in abstract section.
- 6. The originality of the paper needs to be stated clearly. It is of importance to have sufficient results to justify the novelty of a high-quality paper. The Introduction should make a compelling case for why the study is useful along with a clear statement of its novelty or originality by providing relevant information and providing answers to basic questions such as:
  - What is already known in the open literature?
  - What is missing (i.e., research gaps)?
  - What needs to be done, why and how?
  - Novelty of the work should also appear briefly in the Abstract and Conclusions sections.
- 7. An updated and complete literature review should be conducted and should appear as part of the Introduction, while bearing in mind the work's relevance to the journal and taking into account the scope and readership of the journal/proceeding. The results and findings should be compared to and discussed in the context of earlier work in the literature.
- 8. In addition to these items above, your paper can be rejected due to one of the reasons below.
  - Low quality
  - High similarity rates (more than 10%)
  - Copied long paragraphs from literature
  - Missing affiliation
  - Unconvincing results
  - Template error
  - Insufficient content
  - Missing deep analyses
  - Problematic copyright issues of figures taken from literature
